

JOIN US IN STOPPING MARSH VADER!

Independence Township & Oakland Phragmites & Invasive Species Task Force (OPIS) has a plan.

Learn about invasive plants and the ill effects they are having on your property values, safety and our beautiful Great Lakes Environment. This free presentation will address ideas on how invasives can be controlled, who can do it, and how your whole community can reap the benefits of having a proactive plan. We can help you initiate an Action Plan for your community, HOA or private property.
